

Troubleshooting Guide

Problem	Recommended Action
Device does not power on	Charge fully and press Power button for 3 seconds.
No network connectivity	Check SIM card placement and reboot the device.
Payment not processing	Ensure 4G signal is strong and retry.
No audio confirmation	Check and adjust volume levels.
Device frozen or unresponsive	Press Power button on the side for 3 seconds to turn off the device and power on the device after 1 minutes

Safety & Maintenance Guidelines

- Do not expose the device to water or excessive heat.
- Clean with a soft dry cloth. Avoid using cleaning solvents.
- Only use authorized chargers and cables.
- Store in a cool, dry environment when not in use.

User Instruction Manual

P5

pay10.ae

Introduction

Welcome to Pay10!

Welcome to Pay10 family ! We wish you happy payment acceptance journey with Pay10.

P5 is a compact, durable, and 4G-enabled QR-based payment terminal designed to simplify in-store transactions. It features a customer-facing color display, a merchant-facing screen, a tactile keypad, and audio alerts for payment confirmation.

This manual provides all essential instructions to set up, register, and begin using your device for accepting QR code-based payments.

What's Inside the Box

- 1x DQR P5-GD Device
- 1x Power Adapter
- 1x USB Type-C cable
- 1x Printed User Manual
- 1x Micro SIM Card (pre-installed)

Device Components

Customer Display: 3.98" Full Color LCD

Merchant Display: 1" Monochrome LCD

Ports: USB Type-C (Charging), Micro SIM slot

Location: GNSS / GPS

Speaker: Loudspeaker for audio alerts

Battery: 2600 mAh Li-ion Rechargeable

Charging and Powering On

Plug the power adaptor into the device and connect it to a power source (5V/1A).

We recommend, charge the device fully before first use.

Press and hold the Power button for 3 seconds to turn on the device.

SIM Card Installation

P5 devices are shipped with the SIM card pre-installed. If prompted during boot-up then please follow the below mentioned troubleshooting steps or contact Pay10 Support. Please note the device will work only with the dedicated SIM card that is shipped along with that device.

- Power off the device
- Locate the SIM slot present on left side of the device
- Carefully remove the Micro SIM card and reinsert it:
 - Ensure the cut corner of the SIM is facing inwards
 - And, the gold metal chip is facing upwards
- Power the device back on
- The device will automatically connect to a supported 4G LTE network.

Device Registration Steps

To start accepting payments, you must register the device to your merchant account using the **Pay10 Biz** mobile application. After downloading the app, log in using your merchant account credentials.

Follow the steps below:

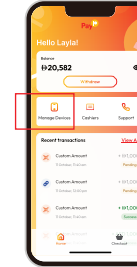

STEP 1 Initial Boot & QR Display

Once the device is turned on, follow the on-screen prompts. Tap on the **Pay** button located on the keypad.

A registration **QR code** will now be displayed on the customer facing screen.

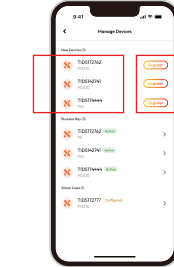

STEP 2 Open Pay10 Biz App

Launch the **Pay10 Biz app** on your mobile device.

Navigate to the home screen and tap on **Manage Devices**.

STEP 3 Select the Device

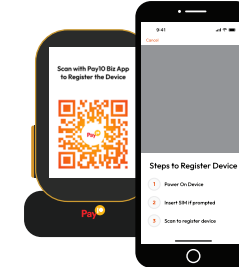

A separate list will display all available New devices that are ready for registration.

From the list, select any Terminal ID where the Device Type is shown as **P5-GD** and reference image also matches with the device you want to register.

Tap the **Register** button corresponding to the selected device to initiate the registration process.

STEP 4 Scan the Registration QR

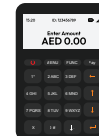

Your mobile camera will activate within the app.

Scan the QR code displayed on the device. **Confirm the registration** when prompted.

Once completed, the device is linked to your merchant account and the status of the Terminal ID will change to Active.

To verify the setup

1. Enter an amount you want to perform test transactions (ex., AED 56.0)

2. Tap on the "O" button on the device

3. A dynamic QR code will be generated on customer facing display

4. Scan it using Pay10 Customer App to initiate a test transaction

5. Once completed, the device will provide audio & visual confirmation & show the status on both displays
